

Getting Techie in Second Grade

Second Grade Breakout Session

Kathy Brott * Jessica Carr * Amanda Hanes * Laura Kimble * Amy Reeves

Collaboration in Inquiry

How can I keep this pace? Your team will keep you going!

Teacher Partners

- ☐ www.planbook.com
- ☐ grade level frameworks

Student Partners/Groups - interest, ability, personality, behavior, experience

- ☐ home court advantage
- ☐ culture of trust
- ☐ byod
- ☐ google docs

Using reading strategies to research

- ☐ Read with a question/topic in mind
- ☐ Reading for the gist; skimming for useful information; teaching effective searches
- ☐ Reading strategies to summarize text from websites
- ☐ Using websites for research and note taking on a Think Sheet (Text, videos, pictures)

Connecting Comprehension and Technology

- Lessons that combine the comprehension strategies with technology
- Companion lessons for both primary and intermediate toolkit lessons

Resource: Connecting Comprehension & Technology Adapt and Extend Toolkit Practices

By: Stephanie Harvey, Anne Goudvis, Katie Muhtaris, & Kristin Ziemke

Our favorite Lessons

- Monitor Comprehension
 - Think about online information (Lesson 2)
 - Students will research their “wonderings” on a select number of teacher approved apps or websites and then reflect on their learning by creating a short video.
 - Notice internet distractions (Lesson 3)
 - The teacher models and students practice how to avoid internet distractions when reading for information on a website.

More favorite Lessons

- Activate and Connect
 - Explore web features (Lesson 7)
 - In this lesson, students explore features that help readers navigate websites - much like text features in a book.
- Ask Questions
 - Share questions online (Lesson 9)
 - Students are naturally curious. This lesson teaches them how to track their questioning online instead of using sticky notes or think sheets.

Using Technology for Homework

- ☐ Homework for students to preview before used in class
- ☐ Students/parents download the apps at home
- ☐ Students become the experts the more they experiment. They will surprise you!
- ☐ Students should use one program to explore at a time and take their time with it.
- ☐ Show student work in class to generate excitement for other students

60 Public Programs/Apps

- ❑ Teachers don't need to learn all the programs, teach students to be the experts
- ❑ Teachers should select a few programs to learn.
- ❑ In the beginning use programs you already know how to use such as PowerPoint/Google Slides
- ❑ Few good apps to start with:
 - Adobe Voice
 - ChatterPix
 - Thinglink

Some Student Examples

- ☐ [Owls PowerPoint](#)
- ☐ [Wolves PowerPoint](#)
- ☐ [Meteors In Space Prezi](#)
- ☐ [Jupiter ThingLink](#)
- ☐ Goats Video
- ☐ [Bearded Dragon Chatterpix](#)
- ☐ [The Relatives Came Book Review Adobe Voice](#)
